

Ready to Ship IHC Carrier-Free Antibodies

No need to wait, we have conjugation-ready antibodies, including antibodies for your immuno-oncology and tumor microenvironment (TME) research.

Get answers faster using our most requested, IHC-validated antibodies. In stock and ready to ship to you in a carrier-free formulation (BSA-free, glycerol-free, and azide-free), these antibodies enable easy labeling for compatibility with your assay platforms.

Carrier-free recombinant antibodies are formulated at high concentrations (>1 mg/ml), ideal for applications requiring labeling, including:

- Metal labeling for Imaging Mass Cytometry (IMC) and Multiplexed Ion Beam Imaging (MIBI)
- Oligonucleotide labeling for multiplexed IHC and immunofluorescence (IF)
- Fluorophore labeling for flow cytometry, IF, and Cyclic IF
